QZEOTM to Distribute New Multipurpose GY-HD250U High Definition Camcorder From JVC Professional Products Company

SAN DIEGO, CALIFORNIA – November 7, 2006 – QZEO (www.QZEO.com) QZEO, the pro broadcast reseller division of Computer Modules, Inc., announced today that they have been appointed to sell the new GY-HD250U high definition camcorder from JVC Professional Products Company.

QZEO is a southern California distributor for JVC Professional Products Company.

In addition to being an affordable studio-capable HD camera, the compact GY-HD250U is a lightweight shoulder-style camcorder with extensive features for Electronic News Gathering (ENG) and cinematography applications. It records in multiple formats to meet the many needs of professional broadcasters and content providers.

The GY-HD250U Camcorder from JVC

“QZEO’s customers will enjoy this camcorder’s flexible recording options,” stated Paul Kasparian, Vice President of JVC’s digital video division. “For news crews, the GY-HD250U has 60 frame progressive recording with high resolution without visible motion artifacts. For cinematographers, it captures film-like quality HD recordings at 24p and 30p, plus it has additional gamma settings for cinema applications. And for broadcasters, our optional KY-HD250 studio adapter turns the GY-HD250U into a studio camera – for about one-fifth the price of standard HDV studio cameras.”

Videographers and cinematographers can record footage onto mini DV tapes or the optional DR-HD100U Direct-to-Edit™ recorder. They can also record on both formats at the same time for archiving purposes. Additional features include flexible connectivity, built-in genlock capability, component and HD-SDI output, and time code sync.

“We’re proud to offer the latest camera in JVC’s Pro HD lineup,” said Ray Asturias, QZEO’s Sales Engineer. “The GY-HD250U is an exceptional camera. In addition to its great features, the GY-HD250U makes it easier to switch from SD to HD. Our customers can use this camera with much of their existing SD infrastructure, including cabling.”

QZEO also offers companion products for the GY-HD250U, including the JVC KY-HD250 Studio Adapter and JVC’s DR-HD100U Direct-to-Edit™ Recorder, for immediate editing with compatible non-linear editing systems.

Supplemental Information for Press Release
