February 4, 2008

AFCEA Booth 404

Computer Modules to Feature Zandar Multiviewers by Harris Corporation at AFCEA West

FusionPro⁺™ Displays up to 26 Real-Time Videos and Images

San Diego, CA –Computer Modules, Inc. (CMI), a leading San Diego based multimedia and imaging reseller will demonstrate the Zandar™ FusionPro⁺™ multiviewer by Harris Corporation (NYSE:HRS) at AFCEA West 2008. Zandar Technologies was recently acquired by Harris Corporation, and together they now offer the widest range of multiviewers available in the industry. AFCEA, the Armed Forces Communications and Electronics Association, sponsors the exhibition in San Diego, California, from February 5 to February 7.

The Zandar™ FusionPro⁺™ multiviewer is part of the new family of multiviewers offered by Harris Corporation.

It is a multi-image display solution for mission-critical security monitoring and surveillance. The 1RU unit displays up to eight channels, and the 3RU unit displays up to 26 channels.

FusionPro⁺™ Series Multiviewer

The FusionPro⁺™ can take any mix of analog, SDI, HD-SDI and computer inputs, and display them on a single screen with output up to HD (1920x1080p). An additional feature is the ZdH Dual output option.

In addition to the FusionPro⁺™, the new range of multiviewers by Harris Corporation includes the recently introduced Zandar™ Predator™ II multiviewer. Specifically designed for control and monitoring, the 2RU Predator II multiviewer can handle up to 32 HD, SD, and analog inputs and is perfectly suited for various applications, including command centers, master control, AV applications, security monitoring, and CCTV surveillance. The Predator II multiviewer has an impressive feature set that includes fast status reporting, auto format detection (16:9 or 4:3) and fast response time as well as virtualisation of UMD, tally and various clock displays.

Another key offering of the family is the Zandar™ QS100™ HD Quad card. Designed specifically for the Sony® LMD production monitor range, the QS100™ HD Quad is configurable as a Quad-split or as any four-window arrangement. It can drive the displays up to a resolution of 1920 x 1200 pixels, with auto-sensing of analog, SDI and HD-SDI inputs.

“We’re proud to be selected to show Harris multiviewer products at the annual AFCEA show,” said Ray Asturias, CMI’s Sales Engineer. “The Zandar™ FusionPro⁺™ is an exceptional display solution. It features pristine video quality, plus it is flexible and easy to set up. Our customers can use it for military surveillance, traffic monitoring, and protecting facilities. It’s also suitable for broadcast monitoring, corporate communications, and digital signage.”

About Zandar Technologies plc

Zandar Technologies, now part of Harris Corporation, was a leader in the development of high quality multi-source display processors that match the specific needs of any display, monitoring and surveillance environment. Founded in 1993, the company combined innovation and experience to provide a wide range of expansive, flexible and resilient Multiviewer solutions for many applications including the FusionPro⁺, Predator, and DX series. Zandar's international customer base included many of the world's leading companies in the Broadcast, Security and professional Audio Visual markets. Zandar Technologies was acquired by Harris Corporation in November 2007.
